NOTE.

1. End of 1932—A special unit was started for quinine distribution in the affected villages. The staff consisted of one Health Officer, six Assistant Sanitary Inspectors and nine Quinine Distributors.

In 1933, 58,017 persons were given relief.

In 1934-35, 55,760 persons were given relief.

In 1935, this system was given up; an itinerant dispensary was established.

2. A scheme for the control of Malaria in 10 villages round Mandya Town was started in February 1935 and the work is being carried on up to date.

3. Government have sanctioned quinine distribution in all the villages irrigated by the Irwin Canal, again appointing six additional compounders.

Government have recently sanctioned Rs. 52,000 for further purchase of quinine. For want of availability of the stuff in India, orders are being placed in Java and the material is expected to arrive early.

4. In addition to the above, the Government appointed a committee consisting of the Superintendent, Bureau of Epidemiology and Communicable Diseases, an Assistant Commissioner and one of the Irrigation Assistant Engineers to visit the villages in the irrigated area to find out all the details as to the causes of the present situation and to submit recommendations for improving it. The committee have submitted two estimates, one for Rs. 30,000 and another for Rs. 20,000. The former which is for draining away the villages between the two valleys Guthaloo and Kallahalli, has been sanctioned by Government and the work is taken on hand. The other estimate for Rs. 20,000 is under the consideration of the Government.

5. As the villages are being surveyed, estimates for permanent Engineering measures, if any, will be prepared and further action taken.

6. Government have passed orders on the general policy of providing a two-furlong dry zone for each village to prevent malaria. Orders have been passed with reference to 28 villages till now.

7. Mandya and Hosahalli tanks have been breached and scouring sluices have been provided for 20 tanks to keep them dry during the summer.

Works to the extent of Rs. 1,33,000 have been undertaken for breaching the tanks and scouring sluices and for lining the channels in the area.

8. A statement showing the sanctioned estimates for the Works to be undertaken by the Public Works Department is enclosed.

Fresh proposals for the control of Malaria in the area are under the consideration of Government.
